

Panasonic® INSTRUCTION MANUAL

Ultra High-Speed, High-Accuracy Laser Displacement Sensor Sensor Head HL-C235BE, HL-C235BE-MK

Thank you very much for purchasing Panasonic products. Read this Instruction Manual carefully and thoroughly for the correct and optimum use of this product. Kindly keep this manual in a convenient place for quick reference.

⚠ WARNING

- This product is intended to detect the objects and does not have the control function to ensure safety such as accident prevention.
Do not use the product as a sensing device to protect human body.
- Be careful not to directly watch or touch the direct laser beam or reflected laser beam.
- The product was developed and manufactured for industrial use.

- **Sensor head model**
Check the model name of product at the top of sensor head.
- **Packing**
Check that all of the following components are included in the package.
 - 1 sensor head unit
 - 1 Instruction manual
 - Laser warning labels
[JIS/IEC/KS: 1 set, GB: 1 set]

- **HL-C235BE, HL-C235BE-MK** displacement sensor head achieves ultra high-speed and high-accurate measurement using linear image sensor as light receiving element to be used on equipment that require high-speed operation with high-accuracy.
- The product is used at diffuse or specular reflection sensor head by installing and setting.

Class	Model	Description of hazardous evaluation
Class 2	HL-C235BE HL-C235BE-MK	Visible beam, low power. Blink response of eye affords protection.

[illegible]

- | Model No. | HL-C235BE | | HL-C235BE-MK | | | | | | |
|--|--|--|-----------------------|---------------------|--|--|--|--|--|
| | Diffuse Reflection | Specular Reflection | Diffuse Reflection | Specular Reflection | | | | | |
| Meas. method (Note 2) | Diffuse reflection / Specular reflection | | | | | | | | |
| Measurement center distance | 350mm | 348mm | 350mm | 348mm | | | | | |
| Measurement range (Note 3) | ±50mm | ±42mm | ±50mm | ±42mm | | | | | |
| Beam source | Red semiconductor laser Class 2 (JIS/IEC/GB/KS)
Max output: 1mW, Emission Peak wavelength: 658nm | | | | | | | | |
| Beam diameter (Note 4) | Approx. ø250μm | | Approx. 250 × 3,500μm | | | | | | |
| Beam receiving element | Linear image sensor | | | | | | | | |
| Resolution | 2.0μm / average times: 256, 0.5μm /average times: 4,096 | | | | | | | | |
| Linearity | ±0.03%F.S. | | | | | | | | |
| Temperature characteristics | 0.01%F.S./°C | | | | | | | | |
| Indicator | Laser emission | Green LED: Lights up during laser emission. | | | | | | | |
| | Meas. range | Yellow LED: Near measurement center:ON, within measurement range:Blink, beyond the range:OFF | | | | | | | |
| Protective structure | IP67 (except connector) | | | | | | | | |
| Pollution degree | 2 | | | | | | | | |
| Insulation resistance | 20M ohms or more by 500V DC megger (between all the terminals and enclosure.) | | | | | | | | |
| Dielectric withstand | Commercial Frequency | AC 500V for 1min. (between all the terminals and enclosure.) | | | | | | | |
| | Impulse | ±1,000V 1/2/50μs (between all the terminals and enclosure.) | | | | | | | |
| Vibration resistance | Endurance: 10 to 55Hz (cycle: 1minute), Resistant amplitude of vibration: 1.5mm, in X, Y, and Z directions for 2 hours | | | | | | | | |
| Shock resistance | 196m/s ² in X, Y, and Z directions for 3 times | | | | | | | | |
| Ambient illuminance (Note 5) | 3,000lx or less (illuminate at beam receiving surface using incandescent lamp) | | | | | | | | |
| Ambient temperature | 0 to +45°C (No dew condensation or icing allowed), At storage: -20 to +70°C | | | | | | | | |
| Ambient humidity | 35 to 85%RH At storage: 35 to 85%RH | | | | | | | | |
| Ambient Height | 2,000m or less | | | | | | | | |
| Material | Main unit case / cover: Die-cast aluminum, Front cover: Glass | | | | | | | | |
| Cable length | 0.5m | | | | | | | | |
| Cable extension | Extendible to 30m long maximum using the optional extension cable. | | | | | | | | |
| Weight | Approx. 450g including cable weight | | | | | | | | |
| Suited controller (Note 6) | Controller ver. 2.00 or later | | | | | | | | |
| Applicable Directives / Applicable Regulations | Compliant with EU Law: EMC Directive / British Legislation: EMC Regulation | | | | | | | | |

Measurement range

Measurement center distance

Dimensions: 0.35, 0.25, 0.35, 2.8, 3.5, 4.2, 0.35, 0.25, 0.35

Technical drawing of the LMS 1540 sensor showing dimensions and mounting details. The drawing includes a side view on the left and a front view on the right. Key dimensions and features are labeled:

- Side View Dimensions:**
 - Top width: 33
 - Top section width: 16.5
 - Top section height: 9
 - Light emission axis angle: 11.6°
 - Measurement center distance: 350
 - Light reception axis
 - Bottom width: 72
 - Bottom section height: 5
- Front View Dimensions:**
 - Top width: 82
 - Top section height: 5
 - Measurement center distance: 350
 - Light emission axis
 - Light reception axis
 - Bottom width: 72
 - Bottom section height: 5
 - Bottom section diameter: $\phi 6.6$
 - Bottom section height: 105
 - Bottom section diameter: $\phi 14.7$
 - Bottom section height: 52
 - Bottom section diameter: $\phi 6.6$
 - Bottom section height: 5
- Mounting and Indicators:**
 - 2-M5 mounting hole
 - Depth: 10
 - opposite surface
 - Laser emission indicator (green)
 - Measurement range indicator (yellow)
 - Measurement range indicator (yellow) diameter: 4.6
 - Measurement range indicator (yellow) height: 83.8
 - Measurement range indicator (yellow) height: 78.8

Technical drawing showing the measurement setup for the light source and receiver. The diagram includes the following dimensions and labels:

- (Measurement center distance)**: Indicated at the top of the diagram.
- 348**: Total horizontal distance between the light source and receiver.
- 10,3**: Horizontal distance from the light source to the first vertical reference line.
- 89,2**: Horizontal distance between the two vertical reference lines.
- 66,4**: Horizontal distance from the second vertical reference line to the receiver.
- (4,6)**: Horizontal distance from the receiver to the third vertical reference line.
- Light emission axis**: Labeled on the left side, pointing to the light source.
- Light reception axis**: Labeled at the bottom, pointing to the receiver.
- 9**: Vertical distance from the light source to the first horizontal reference line.
- 5,8**: Vertical distance from the first horizontal reference line to the second horizontal reference line.
- 59**: Vertical distance from the second horizontal reference line to the third horizontal reference line.
- 108,4**: Total vertical distance from the light source to the third horizontal reference line.
- 81,1**: Vertical distance from the second horizontal reference line to the receiver.
- 44,2**: Vertical distance from the third horizontal reference line to the receiver.
